Nicher sobgula answer pure shell script/command hishebe dilam, kono comment line chara 👇

---

1. Directory + file + even/odd check

```
mkdir -p ~/ReportTest
cd ~/ReportTest
mkdir Files Object Documents Images
cd Documents
touch file1.sh file2.sh
chmod +x file2.sh
```

file2.sh

```
read n
if (( n % 2 == 0 ))
then
echo Even
else
echo Odd
fi
```

Run:

```
./file2.sh
```

---

2. Permission + copy + verify

```
cd ~/Desktop
touch secret.txt
chmod 764 secret.txt
cp secret.txt secret_copy.txt
chmod 700 secret_copy.txt
ls -l secret.txt secret_copy.txt
```

---

3. Eligibility check script

```
read age
read degree
```

```
if (( age >= 22 && age <= 32 )) && [[ "$degree" == "BSc" || "$degree" == "B.Sc" ]]
then
echo Eligible
else
echo Not Eligible
fi
```

---

4. 5 input sum + divide

```
sum=0
for i in 1 2 3 4 5
do
read n
sum=$((sum+n))
done
read d
result=$((sum/d))
echo $result
```

---

5. Reverse number

```
read n
rev=0
while [ $n -gt 0 ]
do
digit=$((n%10))
rev=$((rev*10+digit))
n=$((n/10))
done
echo $rev
```

Jodi chai, ami egula ekta single file project format e (menu driven) o banae dite pari 👍
